

# Thomas Williams

## Full Stack Web Developer | UX-Focused Builder

Kentucky, USA | 270.692.7563 | [thomas.williams.code@gmail.com](mailto:thomas.williams.code@gmail.com) | [GitHub](#) | [LinkedIn](#)

### TECHNICAL SKILLS

---

**Front End:** HTML, CSS, JavaScript, React.js, Next.js, Redux, Ant Design, Axios

**Back End:** Node.js, Express.js, PostgreSQL, SQL

**Additional:** Auth0, Git CLI, GitHub, VS Code, Jest, Cypress, React Testing Library, OpenAI | Python, Lua

### PROJECTS

---

#### Portfolio Site - HTML, CSS, JavaScript - GitHub Pages

[GitHub](#)

Personal developer site featuring live projects, contact links, and rotating image previews.

- Built with semantic HTML and styled using responsive CSS techniques (WIP)
- Uses vanilla JavaScript to rotate project images on load
- Serves as central hub for project updates and personal branding

#### Order of Execution - React, TypeScript, LocalStorage - MVP in progress

[GitHub](#)

A personal task management app designed to reduce overwhelm by focusing the user on one task at a time.

- Features multi-list support with expandable task groups
- Prioritizes clarity and flow over clutter — shows only what matters now
- Roadmap includes: recurring tasks, drag-and-drop sorting, inline editing, and Supabase sync

#### Palworld Copy Site - HTML, CSS - GitHub Pages

[GitHub](#)

Fan recreation of the original Palworld game homepage (as it appeared in 2023).

- Matched original structure and layout for practice in real-world CSS replication
- Built using DOM manipulation and CSS flexbox
- Educational clone; all assets used under fair-use for learning

### EDUCATION

---

#### Bloom Institute of Technology (BloomTech)

2023 - July 2024

- Covered front-end and back-end development with HTML, CSS, JavaScript, React, Node.js, Express, and SQL.
- Completed weekly assessments, front-end and back-end capstones, and BloomTech Labs team projects.
- Demonstrated technical proficiency in algorithms, debugging, testing, RESTful APIs, and responsive design.
- Passed final technical interview and code challenges.

### EXPERIENCE

---

#### Career Reset - Personal Goal Pursuit

July 2024 - Feb 2025

- Took a planned break after completing a full-stack coding bootcamp to emotionally reset and realign my life.
- Launched a 70-Day Transformation Sprint focused on relearning React, rebuilding my portfolio, and preparing for developer roles like Microsoft Leap.
- Currently developing solo projects using React, TypeScript, and Tailwind with an emphasis on clean UI, accessibility, and sustainable learning.

#### Self-Employed, KY - Independent Contractor

2018 - 2022

- Implemented designed Canva graphics for real estate agency, boosting engagement by 40%
- Built lasting client relationships through reliable, consistent service

#### Customer Support & Fulfillment Roles - Amazon, Charter, VXI

2017 - 2018

- Delivered customer service across phone, email, and chat — consistently exceeded performance benchmarks
- Resolved tech and order issues across 3+ systems, improving speed and satisfaction metrics
- Gained expertise in knowledge base navigation, issue triage, and inventory management
